

Mosquito Mountain route
This steep, challenging, but very rewarding route takes the hiker into some beautiful alpine areas, with lakes and ponds, and leads to some summits of Mosquito Mountain. A summit is a rocky outcrop that is challenging to reach, the other is a beautiful and fairly easy ridge with great 360 views on a clear day. More exploration is possible from the alpine area, and it is possible to access the West coast. A boat or canoe is necessary to reach the trailhead to this hike, at the other end of Mosquito lake. Bear country. You can find this trail and many others by activating "public trails" in the Gaia GPS app
